

AWANTIKA SINGH

Dallas, TX | awantika20218@gmail.com | [LinkedIn](#)

Technical professional transitioning to Business Analysis with hands-on experience in requirements gathering, process optimization, and data-driven decision making across manufacturing and utilities sectors.

TECHNICAL SKILLS

- **Cloud Platforms & Infrastructure:** Microsoft Azure
- **Project & Task Management Tools:** MS Project, JIRA
- **Programming & Scripting Language:** Python, JavaScript, HTML, SQL, Maximo
- **Database:** MySQL, Oracle
- **Data Visualization:** Microsoft Excel, Power BI, MS Visio

CERTIFICATIONS

- Completed How to Become a Machine Learning Engineer Skills Path - educative.io
- Certified ScrumMaster (CSM), Scrum Alliance- February 2026
- Mastered key ML concepts including regression, classification, clustering, and neural networks- 2024
- Applied ML techniques to real-world business problems and data interpretation scenarios- 2024

PROFESSIONAL EXPERIENCE

FANUC America-Detroit, MI

Lead Technical Specialist

July 2023 to Present

- Led end-to-end LMS implementation by conducting stakeholder interviews across 5 departments to elicit requirements, performing gap analysis between current and desired state, and translating 25+ business requirements into functional specifications that achieved 95% user satisfaction
- Performed process analysis to identify inefficiencies in data handling, documented current-state workflows, recommended data validation controls, and implemented solutions that reduced inconsistencies by 50% while saving 6 hours weekly
- Conducted stakeholder analysis to understand reporting needs, created dashboard mockups for user feedback, and developed 3 Power BI solutions that automated 35% of manual reporting while providing real-time insights to 15+ key decision-makers
- Analyzed existing purchase order process through process mapping and stakeholder interviews, identified bottlenecks causing delays, documented user stories and acceptance criteria, and implemented SharePoint/Power Automate solution that improved efficiency by 40% and provided real-time visibility to 8 departments
- Conducted data analysis to identify resource allocation inefficiencies, collaborated with training managers to understand scheduling constraints, and created Excel-based analytical models that optimized allocation for 32 instructors and reduced conflicts by 25%

DTE Energy Electric Service Company-Detroit, MI

Student Co-Op

October 2020 to April 2023

- Supported business operations by writing SQL queries to extract and analyze data from Maximo/Oracle systems, created ad-hoc reports for operational stakeholders, and improved ticket tracking visibility that enabled faster decision-making on maintenance activities
- Facilitated process improvement initiative with 12 engineers to identify operational bottlenecks, documented pain points and improvement opportunities, and implemented system optimizations that reduced response time by 30% for 150,000+ customer monitoring activities
- Analyzed data quality issues through trend analysis, collaborated with field technicians to understand data collection challenges, and implemented data governance practices that improved accuracy by 60%
- Gathered reporting requirements from HR and training managers, designed automated reporting solution using Oracle/Power BI/SQL, and delivered monthly training analytics that reduced report generation time by 40%
- Conducted cost-benefit analysis for 3 major projects, evaluated alternative solutions against business requirements, and recommended implementations that delivered \$18K in annual cost savings
- Analyzed integration gaps between Energy Management System and PI Process Book, gathered requirements from operations team, and coordinated technical implementation that reduced outage investigation time by 60%

EDUCATION

Bachelor's Degree in Computer Science

May 2023

College: Wayne State University-Detroit, MI
